Re: Response to DOGM review of December 26, 2001 regarding Gold Star Stone, Inc., Lone Pine Quarry, M/003/050, Box Elder County, Utah

Dear Wayne:

Enclosed is the response to the Division's review of December 26, 2001 regarding Gold Star Stone's Lone Pine Quarry. We have addressed only the items contained in the review; with one exception. The text has been retyped, and submitted in full for the items requiring a response. All changed or added text has been underlined. If it is not underlined, it has not been changed.

No changes were required for Rules R647-4-106.3 and R647-4-107.6. They were not included for this response. One paragraph addressing soil/subsoil stockpiles that was under Rule R647-4-107.5 has been moved to R647-4-106.5 because that is where the review question was asked. The paragraph was underlined because it was moved; however there were no changes to the text.

Rules R647-4-111.8 and R647-4-112 were added to this response because of the review question addressed under R647-4-111.8 which referred to R647-4-110.2. We felt that if these rules were not addressed now, another review would be sent requiring a response to these rules.

Map C-2 was revised to show the West Quarry and the East Quarry at the same scale of 1" = 200', and to address the question asked under R647-4-107.5. Map E-2 was added to show the roads discussed under R647-4-110.2, R647-4-111.8, and R747-4-112. Map E-3 was added to address the question asked under R647-4-110.2. Map H was added to address the question asked under R647-4-105.3. No changes were made to any other maps; therefore they are not being submitted with this response.

We hope our responses have adequately addressed the Division's questions.

Sincerely,

David J. Ryzak
